Abstract: this article analyzes the military-patriotic education of youth and its goals and objectives. The process of patriotic education plays a leading role, has a great influence on the formation of the future defender of the Fatherland, since the content of educational disciplines reflects important spiritual, moral, cultural traditions of our people. But this process is not enough to limit itself to individual components of patriotic education. He must be ready to defend the Motherland, provide comprehensive active practical influence on the state of all its components and promote awareness this readiness as the most important aspect of the life of young people.

Keywords: military patriotism, combat qualities, military knowledge, combat skills, discipline and organization, combat brotherhood, military oath.

Military-patriotic education provides for the development of young people's interest in military service, mastering military professions, assistance in preparing young people for military service. Armed Forces of the Republic of Uzbekistan. Currently, the content and process of military-patriotic education are being enriched traditions related to the renewal of the educational system of the educational institution of the Republic, the acceleration of the socio-economic development of the country, the growing role of human factors in the defense of the Motherland and drastic changes in the organization of combat labor.

The main objectives of military-patriotic education are: the love of youth for Respect and devotion to the Armed Forces of Uzbekistan; dedication to the work and traditions of our ancestors; constant commitment to the defense of the independence of the Motherland with weapons in the manifestation of young people's interest in the military profession, to the honorable duty of service in the ranks The Armed forces.

The main task of military-patriotic education is the comprehensive development of a sense of independence, one's own path of development, love for the Motherland, pride, love for the Armed Forces, devotion to military and labor traditions, respect for military labor, the formation of constant readiness to defend freedom and independence, weapons in our hands, to to fulfill their civic duty.

The purpose of military-patriotic education is the formation of thought, confidence, and a worldview that will ensure readiness to defend the Motherland, give it strength, and, if necessary, life. Military-patriotic education of young people is one of the most important spheres of activity of our state. It is necessary to analyze the effectiveness of educational measures, choose and to strengthen the traditional forms set and proven by the practice of military-patriotic education, to look for new forms of more complete implementation in modern conditions of the tasks of preparing young people for the defense of the Fatherland.

We can consider readiness to defend the Fatherland as the result of special mass defense work, military sports games and other important forms of military patriotic education. Military-patriotic education in educational institutions is carried out in order to:

- formation of loyalty to their people, deep respect for the history and traditions of the Motherland;
- education in the spirit of unconditional execution of presidential decrees, laws and resolutions of the Oliy Majlis and the Government of the Republic of Uzbekistan;
- promotion of military patriotic traditions of the peoples of Uzbekistan, education of young people love for military service and the army, high moral and combat qualities, personal responsibility for the fulfillment of

the military oath and military regulations, as well as courage, discipline, dedication, constant readiness to defend their homeland. The main content of military-patriotic education: explanation of the Constitutional duty of citizens of the Republic of Uzbekistan in protecting their Homeland; familiarization with government resolutions on further strengthening the defense of the Republic of Uzbekistan; explanation of issues solved by the Armed Forces of the Republic of Uzbekistan, their tasks and features; explaining the goals and objectives of preparing young people for military service; promoting the heritage of our ancestors, the martial traditions of our great and brave ancestors. Military-patriotic education also requires that the preservation of the protection of the Motherland, peace and prosperity of the country and the people become a sacred duty of every young person. Of course, for to fulfill these noble tasks, it is necessary to make extensive use of the educational possibilities of fiction, which is the sharpest weapon, for this not only in the course of lessons, but also in extracurricular classes to educate in the spirit of devotion tomorrow, true patriots of independence. A striking example is the heroes literary works, historical figures, selfless people of the Motherland, who bring up a sense of patriotism among young people, first of all, love for the Motherland, respect, contribute contribute to its prosperity.
